To  
All the Head of SSAs,  
BSNL, Tamilnadu Circle.

Sub: Preventive maintenance and improving performance of P2 network of Broadband.

Of late it is observed that there are problems in the P2 network owing to the poor performance of STM1 converters, interfacing the Tier 2 switches and the Tier1 switches.

It is suggested that these converters may be eliminated by re channelizing the existing medium through MADM systems, where ever installed.

This will not only cease the faults occurring in between the aggregation switches but also improve the performance of the P2 broadband system.

The details of the T2 switches installed and their respective T1 is enclosed in the annexure for immediate action.

All node in charges are instructed to communicate the progress of the migration of medium to the email id [yesbalu@gmail.com](mailto:yesbalu@gmail.com) everyday till the task is completed.

The target for completion of this assignment is fixed as 28.2.2011.

Any difficulty in getting medium allocation for this may also be communicated.

*Signed*
